

## 385W solar panels

35mm Anodised Aluminum Frame, White Backsheet. The new high-performance module Q.PEAK DUO L-G5.3 is the ideal solution for commercial and utility applications thanks to a combination of its ...

The MSE385SX5R PERC 66 mono-crystalline solar panel is a 66 cell solar panel with the highest power output in its class. It's high efficiency and certified reliability make it ideal for utility grid-tied ...

**High Power Output:** With a power output of 385W, these panels can generate more electricity per panel than standard solar panels, enabling system designers to save money on balance-of-system costs ...

**Advantages of 385 Watt Solar Panels**  
**Average Price For 385 Watt Solar Panels**  
**Size of 385 Watt Solar Panels**  
High wattage allows you to use your space more efficiently. A frame from anodized aluminum improves the durability of a module and makes it resistant to hail, wind and storms. Improved construction gives modern solar panels an energy conversion rate better than ever before. More than 25 years of green energy for your home, shop or office. See more on [a1solarstore](#) [ussolarsupplier](#) [Trina 385W \(Pallet of 36\) Bifacial Solar Panels TSM-385NE09RC.05](#) Thanks to the N-Type TOPCon cell technology and optimization of cell processes and module materials, the Trina Vertex S+ 385W panels demonstrate excellent low-light performance (IAM).

Jinko Solar module provides 385 Watts of power with 19.13% conversion rate -- much higher than average numbers in the industry. High production levels are achieved by using Diamond ...

Check the current prices for 385 W solar panels in our store. A typical solar panel is 65 x 39 inches. The size may vary depending on the number of cells. In commercial systems 72-cell and ...

LG Solar offers precision-manufactured and market-leading solar panels for businesses and homeowners who demand high performance, reliability and consistently strong energy yield--all from ...

This 1500 V IEC/UL solar module with its 6 busbar cell design ensures superior yields while having a very low LCOE. Hanwha enhanced low-light performance and the output of Q CELLS across a wide ...

Thanks to the N-Type TOPCon cell technology and optimization of cell processes and module materials, the Trina Vertex S+ 385W panels demonstrate excellent low-light performance (IAM).

**High 385W Power Output:** Delivers strong energy production, allowing fewer panels to achieve target system size. **Tier 1 Manufacturer:** Built by Boviet Solar, a globally trusted Tier 1 brand known for ...

Shop here to find low priced solar panels that generate 385 watts of DC power. These modules can be grid-tied or used off-grid for residential, commercial or community renewable energy generation. All ...
