

The Development of an Android Applications Model for the Smart Micro-Grid Power Pool System Monitoring and Control

The design and implementation of a smart microgrid system that integrates solar and wind power plants with the national grid (PLN), using an Automatic Transfer Switch (ATS) and a mobile application for ...

The App can realize the balance between energy supply and demand, reduce electricity costs, and support outdoor use for home and outdoor microgrid scenarios. The Microgrid App is ...

The Android Applications Model for the Smart Micro-Grid Power Pool Monitoring and Control Scheme is the major contribution to the work. The Rational Approach for Energy Sustainability was achieved ...

The solution is to create a hybrid automatic transfer switch (ATS) system. The system works automatically as a hybrid power plant using a solar cell and PLN using ATS and remote ...

Microdroid is a mini-Android OS that runs in a pVM. You don't have to use Microdroid, you can start a VM with any OS.

Microdroid is a (very) lightweight version of Android that is intended to run on on-device virtual machines. It is built from the same source code as the regular Android, but it is much smaller; no ...
