

Automatic Folding Container Type for Chemical Plants

It is a fully automated robotic filler designed for high-production, precision-weight filling of large-capacity containers directly on the pallet. Who is this machine designed for? It is ideal for chemical ...

Customers can fully load to fill every corner, maximising the container space. Full containment can occur without having to disconnect or connect so no harmful or potentially explosive dust or chemical ...

For over 30 years, PACK'R has been designing and manufacturing semi-automatic and fully automatic filling machines for a wide range of containers: bottles, jerry cans, pails, drums and even IBCs.

All reusable containers are suitable for the transport, storage and further processing of paste-like, liquid or temperature controlled media. Protect your media from external influences and create a safe ...

Combi provides custom chemical packaging equipment for industrial use, offering automated solutions for various container types with reliable performance.

Our automation containers are manufactured to exacting tolerances to ensure reliability and complete conveyability in high-speed AS/RS systems. Why Give Our Automation Containers the Last Look? ...

Designed for chemical manufacturing challenges, our liquid filling equipment optimizes production, ensures safety (product, personnel, environment), and handles diverse containers including bottles, ...

Our systems integrate agitators for homogeneous chemical mixing, delivering precise dosing within a compact, portable ISO container. With robust safety features and global standard compliance, we ...

They provide a practical solution for smaller production volumes or specialty chemicals, combining adaptability with ease of use - ideal for production lines handling a wide range of container types and ...
