

China Mobile increases base stations

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) previously announced during its annual work conference.

How many 5G base stations are there in 2024?

"Accumulatively, there were over 2.4 million 5G base stations put into use [at the end of 2024]. We have built the world's first large-scale commercial 5G-A network, with RedCap covering all cities nationwide and gigabit broadband covering 480 million households," said China Mobile in its annual report.

How did China Mobile perform in a year?

For the full year, China Mobile reported a five percent increase in net profit, reaching CNY138.4 billion, while operating revenue climbed 3.1 percent to CNY1 trillion. Service revenue grew three percent to CNY889.5 billion, and product sales saw a 3.8 percent increase to CNY151.3 billion.

What is China Mobile's revenue segment?

China Mobile now categorizes revenue into four segments: mobile, home broadband and smart home, enterprise, and new business. Mobile revenue saw a slight decline of 1.3 percent to CNY483.7 billion, while home broadband expanded 8.5 percent to CNY106.8 billion. Enterprise revenue increased by 8.8 percent to CNY209.1 billion.
