

China's largest solar power station map

Data and information about Solar power plants and their location plotted on an interactive map of China.

We provide a remote sensing derived dataset for large-scale ground-mounted photovoltaic (PV) power stations in China of 2020, which has high spatial resolution of 10 meters.

Get to know the projects' power generation capacities in MWp or MWAC, annual power output in GWh, state of location and exact location on the map, name of developer, year of connection to the electric ...

China is home to a number of the world's largest solar power plants. The East Asian nation, which is the largest emitter, has ramped up its share in the fast-growing renewable energy ...

Western China: Provinces like Gansu, Xinjiang, and Inner Mongolia host many of China's largest wind and solar farms due to their strong wind conditions and abundant sunlight.

To sum up, we provide a 10-m map for China's PV power stations to provide reference data to understand the spatial pattern of China's PV industry. The dataset could also be used for other ...

The high-altitude Kela photovoltaic (PV) power station in Sichuan can save over 600,000 tons of standard coal annually by combining both solar and hydropower to produce electricity.

In 2011, China owned the largest solar power plant in the world at the time, the Huanghe Hydropower Golmud Solar Park, which had a photovoltaic capacity of 200 MW. In 2018, it held the record again ...

OverviewHistorySolar resourcesSolar photovoltaicsConcentrated solar powerSolar water heatingEffects on the global solar power industryGovernment incentivesChina is the largest market in the world for both photovoltaics (PV) and solar thermal energy. Its PV capacity crossed 1,000 gigawatt (one terawatt, 1 TW) in May 2025. By June 2025, China's PV capacity surpassed 1,100 gigawatt. In 2024, China added 277 gigawatts (GW) of solar power, which was equivalent to 15% of the world's total cumulative installed solar capacity.

China's 3.5 GW Midong solar farm now holds the title for the world's largest, providing a sustainable power benchmark and eclipsing previous records.
