

Enterprise solar power generation projects

The Major Solar Projects List is a database of all ground-mounted solar projects, 1 MW and above, that are either operating, under construction or under development.

In our STEO forecast, utility-scale solar is the fastest-growing source of electricity generation in the United States, increasing from 290 BkWh in 2025 to 424 BkWh by 2027. Almost 70 ...

In this week's list, we take a deep dive into the uses and application of solar power, including agriculture, aviation and retail.

Deciding where solar projects will be installed is one of the very first decisions to be made in a project development timeline. While residential solar is most commonly found on rooftops, utility-scale and ...

Real-world enterprise solar case studies showcasing cost savings, scalability, resilience, and sustainability wins across industries.

Located in Kern County, California, the Enterprise solar storage project currently under construction is part of one of the largest hybrid renewable energy facilities in the country. Once complete, the project ...

Explore the top US utility-scale solar projects of 2024-2025. Learn how gigawatt-scale farms and integrated battery storage are powering America's energy future.

Pattern Canada is developing the Enterprise Solar project in Vulcan County, Alberta. The facility will bring community revenue, local jobs, and benefits lasting generations.

Discover the world's biggest operational solar farms and the mega projects set to reshape tomorrow's renewable energy landscape.

This project is one of the key agricultural photovoltaic power generation projects in Wanning City, making full use of the local barren slopes and abundant solar energy resources, transforming natural ...
