

# Fixed Server Rack Project Solution for Edge Computing

All-in-one, self-contained, prefabricated micro data centers for edge computing. With up to 8kW of integrated cooling, EdgeRacks are ready to be deployed wherever you need them.

Though rack power in edge data centers can be complex, existing specifications and frameworks from the Open Compute Project Foundation (OCP) have eliminated the need to start from scratch

A technical specification framework for wall-mount rack enclosures prioritizing serviceability, physical security, and space footprint.

We combine rugged durability, advanced cooling integration, and high-performance rack design to ensure your edge deployments are reliable, scalable, and easy to maintain--no matter where they're ...

Explore what Edge computing is and how it (and the right IT enclosure system) can handle scalability, security, protection, disruptors, and standalone solutions.

Intelligent power management company Eaton today announced it has expanded its family of self-cooling server racks with the North American launch of its new SmartRack™; 5.5 kW self ...

The Edge Rack from SCH#196;FER IT-Systems is the right choice for setting up your Edge network. Our experts will be happy to advise you!

Specifically, I'm looking at how to integrate powerful rack servers into systems that require real-time data processing at the edge. I've been working on a project where we need to ...

Server racks play a key role in any Edge deployment, whether it is a small IT closet or a full-scale buildout. They should be designed to handle today's needs, while also being flexible enough to scale ...

We can help you choose server racks tailored to your specific needs and the environment in which your edge data center is located. We'd welcome the opportunity to meet with you to discuss ...
