

Looking for a reliable robot glass loading machine for your automatic solar module production line? Explore our high-quality and efficient options now!

When handling delicate products, such as glass-covered or laminated modules, our robots' exceptional positioning accuracy (0,05 - 0,08 mm) assures maximum safety.

The robots designed by our staff manage the most diverse glass processes and, combined with loading and unloading machines, guarantee a significant reduction in the human resources required. Fewer ...

Solar Robot Arm Glass Loading Machine REOO Manipulator Robot Arm for solar panel production line. Automatic, efficient, and reliable. Shop now for quality!| Alibaba

A landmark GRABO® robot tool, Glassworker 250 can pick up, transport, and install heavy panes of glass. Lifting up to 250 kg, Glassworker is ideal for commercial and industrial use.

Improve glass transport with our state-of-the-art handling robot. Its adjustable vacuum clamp safely captures and delivers glass of any size. It automatically transports glass panes to a squared-off dock, ...

In solar panel production, the robot automates the cutting of glass panels, enhancing throughput and ensuring consistent, clean cuts required for photovoltaic cells. Why Our Robots? The robot is ...

Glazing robots enable glazing from the inside-out when scaffolding and craneage is not feasible. The largest capacity glazing robot is the Oscar 1400, which has a capacity of 1400kg but, at just 1303mm ...

Equipped with a vacuum suction system and multi-directional lifting arm, it can lift, tilt, and rotate heavy glass precisely while minimizing the risk of breakage or worker injury.

The ECOGLASS R is a cutting-edge glass layup robot tailored for the solar panel industry. Designed to handle up to 200 glasses per hour, this robot streamlines the glass layup process with dual pallet ...
