Since June 17, the Péligre hydroelectric plant, one of the country's primary sources of power, has been offline. Residents of Mirebalais forced the shutdown in protest, demanding stronger ...

Women and children are most affected by the conflict, accounting for more than half of all displaced people in Haiti. Many families have been separated as parents send their children to stay ...

Haiti has experienced over 20 changes in government since 1988, disrupting long-term planning and implementation in the electricity sector and leading to extensive delays in updating national energy ...

Haiti's crisis is not only defined by politics or guns but also by the struggle for land and water, with climate change emerging as a driving force behind both displacement and insecurity.

Recognizing the enduring roles of corruption, violence, and impunity in Haiti's institutional landscape, the plan's first objective seeks to strengthen Haiti's governance structures and ...

The electricity sector poses a major constraint to economic development, emergency response and recovery in Haiti. The sector is experiencing challenges exacerbated by recurrent fuel shortages and ...

On 18 June, the Humanitarian Country Team issued an alert highlighting the critical lack of resources to respond in the event of a cyclone. The risk of a major storm is above the 30-year ...

While all of these deteriorating conditions carry a tremendous impact, above all what we're seeing in Haiti is a deterioration of social ties. Communities have been torn apart by displacement ...
