

Home Solar Power Generation Report

What is the global residential solar PV market worth?

The global residential solar PV market was valued at USD 94.2 billion in 2024 and is estimated to reach the value of USD 198.9 billion by 2034, growing at a CAGR of 7.9% from 2025 to 2034.

How has the residential solar market changed in 2024?

Declines in residential solar markets have been a hit to the industry--but its foundation is strong. Worldwide, 2024 was a difficult year for the residential solar market. After several years of 30 percent annual growth in installations, 2024 saw a decline: fewer panels were installed in many markets, and companies' valuations declined.

What is residential solar PV?

Residential solar PV consists of photovoltaic cells and is nonchemical technology that turns sunlight into energy to power household appliances and equipment. It is a rapidly growing renewable energy technology and plays a vital role in global energy transformation. The residential solar energy market is segmented by geography.

How big is the solar PV market in 2034?

The on grid segment is anticipated to cross 15.5 billion by 2034. The residential solar PV market size crossed USD 94.2 billion in 2024 and is estimated to grow at a CAGR of 7.9% from 2025 to 2034, due to the shifting consumer focus on clean energy sources.
