

# Huawei belgium power storage vehicle

Huawei has advanced its efforts in energy storage by patenting a sulfide-based solid-state battery. This innovation aims to provide a driving range of up to 3,000 km with ultrafast-charging capabilities ...

Huawei provides smart components and systems for autonomous vehicles, helping manufacturers produce cars that are better, safer, and cleaner. [Click here to learn about the capabilities of Huawei's Advanced Driving ...](#)

In an effort to improve its energy storage, Huawei has submitted a patent application for a battery with a 3,000-kilometre range and a five-minute charging time.

Huawei is the latest in a growing list of automakers and tech companies that are exploring the possible benefits of fitting an EV with solid-state batteries, with the likes of BMW, Mercedes-Benz,...

Huawei promises that its battery technology could deliver around 1,864 miles of range and achieve a 10% to 80% charge in under five minutes.

Huawei has stepped up its ambitions in advanced energy storage with a patent for a sulfide-based solid-state battery that offers driving ranges of up to 3,000 kilometres and ultra-fast charging in just five minutes.

Huawei's patent for a solid-state battery capable of powering a car for 1,860 miles and recharging in five minutes is audacious, perhaps even visionary. While it may take years before such claims are tested ...

Huawei has developed solid-state battery tech that could make EVs go further and charge faster. Cells have triple the energy-density of li-ion ones and could theoretically give an 1,800-mile...

Huawei is developing a solid-state EV battery it says can deliver 1,800 miles of range after a five-minute charge. The project appears in a 2023 patent filing, suggesting it has been in development for at least ...
