

Ireland's new solar power system

Despite the promising growth, Ireland currently remains well behind its 2030 target of 8 GW of installed PV. Its total installed solar capacity was 1.76 GW at the end of May. Utility-scale...

Ireland has emerged as a global frontrunner in the integration of renewable energy sources such as wind and solar power. Wind power supplied around a third of Ireland's electricity in ...

Ireland celebrated a landmark moment in its clean energy transition, with national solar capacity surpassing 2GW for the first time, it has been revealed. This milestone reflects the ...

Ireland Targets 8GW Solar by 2030: Achieving the Ireland solar energy target Ireland is on a determined path to reshape its energy landscape, with solar power playing a pivotal role. The ...

Ireland celebrated a landmark moment in its clean-energy transition, with national solar capacity surpassing 2 GW for the first time. This milestone reflects the remarkable pace of growth in ...

This milestone reflects the remarkable pace of growth in Ireland's renewable energy sector. Since our first solar farm was energised in April 2022, national capacity has expanded to 2.1 ...

Ireland has reached 2GW of solar power. Encom explains what this milestone means for homes and businesses in 2026 and how the EUR1,800 SEAI grant supports new installs.

On March 25th, 2025, Ireland reached a new record for grid-scale Solar power, generating over 750 Megawatts (MW) at one point, 18 MW more than the previous peak set in July 2024. This new ...

“Ireland has made huge progress in our journey to renewable energy. Wind power supplied approximately one third of national electricity demand in 2024, with renewables accounting for ...

Ireland has officially reached 2 gigawatts (GW) of installed solar capacity, marking a historic milestone in the country's renewable energy journey and demonstrating that solar is now a ...
