What are the requirements for a Bess energy storage system?

For a Lithium-ion Battery Energy Storage System (BESS),the components must comply with all codes and standards relevant to the operation and installation of energy storage equipment. All installed equipment must be tested and approved by Underwriters Laboratories (UL) or another nationally recognized testing facility.

What is a 4 MWh battery storage system?

4 MWh BESS includes 16 Lithium Iron Phosphate (LFP) battery storage racks arrangedRated power2 MWIn a two-module containerized architecture; racks are coupled inside a DC combiner panel. Power is converted from direct current (DC) to alternating current (AC) by tw

What is a battery management system (BMS)?

A Battery Management System (BMS)is provided to control the charging and discharging of the equipment. It can be field programmableby connecting with a laptop and viewing/editing on a locally hosted web browser. (Remote sites without internet access may not require remotely programmable capability).
