

Netherlands Solar Mobile Charging System

We Drive Solar's Solar City public charging station can now be found in many places in the Netherlands and is already deployed by several key customers. In cooperation with Renault and ...

Pioneering AC V2G project with 22 chargers installed as part of city-car share scheme and solar in Lombok. Now seeking to scale up to 1000 chargers across region of Utrecht.

This system connects 96 solar panels directly to three bi ...

Building on experiences and results from an earlier project, the smart solar charging (SSC) project contributes to environmental sustainability, a low-carbon economy and social sustainability. Five ...

The battery modules will be charged with solar energy at De Dijken and transported to events, construction sites, and other temporary applications in order to upgrade small grid connections and ...

Networks of smart and bi-directional charging cars, stationary batteries and other decentralised sources offer a fast-growing flexibility potential that can grow into an integrated, city-wide flexibility system.

The Solar City charging post from We Drive Solar can now be found across the Netherlands and is already being used by several leading customers. In Europe's largest bidirectional charging project, ...

PowerGo's charging solutions are powered by solar energy, generated by the solar parks of parent company PowerField. In areas with grid congestion, PowerField and PowerGo are looking ...

Smart Solar Charging is a sustainable energy system on district level. It combines the production of renewable energy with Vehicle2Grid-charging points and car sharing systems.

Discover the Smart Solar Charging project in Utrecht, promoting environmental sustainability and renewable energy through bidirectional charging technology.

This system connects 96 solar panels directly to three bi-directional DC chargers, allowing EVs to charge more efficiently and even return energy to the grid when needed.
