

New York electric grid asuncion

Will New York's electrical grid be reliable in 2026?

The current state of the electrical grid in New York is uncertain-the upstate region, while reliable now, is seeing potential for large load growth leading to reliability shortfalls, and the downstate region faces significant reliability challenges starting as soon as summer, 2026.

What is NY grid connect?

NY Grid CONNECT is advancing innovation across the State and globally to build a low-carbon, reliable, and resilient grid. Our collaborative platform unites a diverse group of stakeholders to define challenges and develop comprehensive solutions targeted to meet the State's electric grid priorities emerging from the Climate Act Scoping Plan.

Does New York have a grid?

New York's electricity transmission system, or "grid", is unique in that the grid operator that manages the system, the New York Independent System Operator (the NYISO), only manages the grid within New York State. The only other states that have a similar structure are California with CAISO and Texas with ERCOT.

Who manages the electric grid on Long Island?

The Long Island Power Authority (LIPA) contracts PSEG-LI to manage the grid on Long Island. Several New York Municipalities have their own electric utility companies as well. The New York Power Authority acts as a utility company to public entities, businesses and electric cooperatives.
