Photovoltaic panel capping machine

Need help in choosing the best machine and technological solution to meet your needs? Contact us to learn more about the customized solutions that our engineering team is able to develop.

Leveraging high-precision control and multi-protocol compatibility, LingChen PLC provides an efficient and stable motion control solution for PV junction box capping machines.

The Junction box automatic capping machine is a powerful solution for manufacturers seeking to streamline their production processes. With its compact layout, wide compatibility with ...

Discover the ECO J-BOX R, a fully automatic station for complete application of solar panel junction boxes. From ribbon raising to patented j-box soldering.

Used for automated lid capping of PV junction boxes. Features a compact, integration-friendly design and is compatible with mainstream J-Box types for quick changeover.

Junction box machines are automatic equipment for soldering and glue potting of PV junction boxes. Featuring high efficiency and stability, they are indispensable solar panel production equipment with ...

Realize automatic installation of solar module junction box cover, improve installation efficiency and quality. The equipment is made with European standard 40*80 aluminum profiles or equivalent ...

Our automated Solar/PV modules production line includes a complete set of equipment, such as solar cells laser cutting, string soldering, welding, glass loading, layup, laminating, framing, J-Box ...

1,The equipment adopts European standard 40*80 aluminum profile or the same strength welded steel frame production, the overall stability, no vibration in operation. 2, Manipulator grasp, visual ...

Used for automated lid capping of PV junction boxes. Features a ...

ConfirmWare is a leading and trusted provider of automatic machinery for solar panel production lines for local and international manufacturers. All equipment is optimized to perform the intended task ...
