

# Photovoltaic panel dumping

We have received a number of inquiries regarding the implications of the new solar panels antidumping (AD) and countervailing duty (CVD) investigations. With the ITC just issuing its ...

In its antidumping and countervailing duty petition (the Petition), the Petitioner alleges that the CSPV dumping practices of the Subject Countries undercut domestic manufacturing efforts and ...

[View a list of our recent AD/CVD case announcements.](#)

Currently, PV panels are disposed of in landfills, raising concerns about resource loss and environmental contamination.

Solar panels convert solar energy into electricity through solar cells (also known as photovoltaic cells). Solar panels sometimes contain toxic metals, which means they may designate as dangerous waste.

A report by Forbes highlights the concerning lack of solar panel recycling, with the vast majority ending up in landfills or informal dump sites. This threatens to undermine the clean energy benefits of solar ...

The U.S. Department of Commerce (Commerce) preliminarily determines that, except as noted below, imports of certain crystalline silicon photovoltaic cells, whether or not assembled into ...

When solar panels, which typically have a 25-30 year lifespan, reach the end of their lives and become waste, they must be managed safely. [Learn about this renewable energy waste, ...](#)

Solar and wind waste is piling up with no clear plan for disposal, raising new questions about the cost of going green and the myth of net zero.

The US Commerce Department set final countervailing and anti-dumping duty rates on Monday for crystalline solar cells and modules imported from four southeast Asian countries.
