Say goodbye to "water damage!" Learn how solar panel water drain clips work, benefits and installation tips for enhanced performance & longevity.

Check your panel specifications to see if they are rated for high pressures (eg 6bar). If you couldn't get glycol into the expansion tank, you can reconnect the mains pressure fill pipe again.

3 Special Requirements For Solar Plumbing

When the pump is not running in a drain-back solar system, all of the liquid is inside the building and the solar panels are empty of fluid. A small tank (the drain-back vessel) holds the liquid so that the resting fill level is above the pump. If there is heat to be collected from the solar panel, the pump is energised by the solar controller, and...See more on viridiansolar.uk.
