Where should photovoltaic panels be installed?

The choice of location is a critical factor during the installation of photovoltaic panels. Roofs--flat or sloped--are the most common installation sites, offering excellent sun exposure and energy production optimization. However, in some cases, such as when the roof is unsuitable, ground installation may be a better option.

Can a wall install a photovoltaic system?

Although less efficient, wall installations can supplement a photovoltaic system effectively. Balcony-mounted panels are primarily used in residential buildings. Typically, 1-2 panels are installed on the balcony railing. This setup can help reduce energy costs for apartments where roof installation is not feasible.
