

# Price of self-installed solar panels

How much does it cost to install solar panels?

Opting for DIY solar panel installation can significantly reduce the labor costs associated with professional installation. On average, installing solar panels yourself costs between \$7,000 and \$18,000, depending on the system's size. If you have the necessary knowledge, skills, and time, self-installation can be a worthwhile way to save money.

How much does a solar system cost?

The solar industry doesn't have a standard pricing structure, so the cost to the customer is based on their energy consumption. The cost of a solar system installation can vary widely when you compare the efficiency rate of the solar panels and other installation expenses. The best solar panels can set you back anywhere from \$15,000 to \$50,000.

Are solar installations cheap?

Solar installations aren't cheap, but the actual equipment is a relatively small part of the total cost. It's only 35% of your total installation cost, according to the US Department of Energy. Soft costs, also known as the hidden costs of installing solar, are nonhardware costs, and they make up 65% of your total solar costs, according to the DOE.
