

Recommended purchase of large-scale outdoor telecom enclosure on promotion

What are outdoor telecom enclosures?

Outdoor telecom enclosures are structures designed to protect and house telecommunications equipment outside. They come with a range of options including cable management, thermal management, environmental protection, and integration. All these solutions and enclosure products can be custom-made. KDM relies on custom and standard NEMA standard telecom cabinets to protect their internal equipment.

What is a telecommunications enclosure?

A telecommunications enclosure is a structure that supports a combination of active components and patch panels or other panel-mount termination hardware. It includes a junction box for power and a fan to remove heat generated by active components. Telecommunications enclosures serve as a consolidation point using patch panels or other panel-mount termination hardware.

What are outdoor Telecom cabinets?

Our outdoor telecom cabinets are designed to protect your sensitive network equipment from harsh environments where equipment may be exposed to dust or water. For added protection, there is a water and dust proof polyurethane door joint strip.

Why should you choose a NEMA 4X outdoor enclosure?

Corrosion can be a big problem in many different enclosure applications, and a NEMA 4X outdoor enclosure can help protect your devices. AZE can also provide customized products or projects based on requirements, choose from a broad range of models, configurations, mounting options, sizes, finishes and type ratings.
