But how much of an impact has this growth had on our energy systems? In this interactive chart, we see the share of primary energy consumption that came from renewable technologies - the combination ...

We explore the data to see where the clean energy transition stands today, from rising investment and job growth to grid needs and critical mineral demand.

The global industrial and commercial energy storage market is experiencing explosive growth, with demand increasing by over 250% in the past two years. Containerized energy storage solutions now ...

As renewable sources like solar and wind grow in popularity, these systems are critical to addressing their intermittent nature by storing energy for later use.

Globally, renewable power capacity is projected to increase almost 4 600 GW between 2025 and 2030 - double the deployment of the previous five years (2019-2024). Growth in utility-scale and distributed ...

Renewable Energy GenerationRenewables in The ElectricitymixHydropowerWind EnergySolar EnergyBiofuelsGeothermalHow much of our electricity comes from renewables?In the sections above we looked at the role of renewables in the total energymix. This includes not only electricity but also transport and heating. Electricity forms only one component of energy consumption. Since transport and heating tend to be harder to decarbonize - they are more reliant on oil and gas - r...See more on ourworldindata Missing: alofiMust include: alofiocard ALOFI WIND SOLAR AND ENERGY STORAGE TRENDS AND ...The global industrial and commercial energy storage market is experiencing explosive growth, with demand increasing by over 250% in the past two years.
