Hard Talk on Renewable Energy in Russia (October 14-15, Moscow, World Trade Center, Gostiny Dvor)

That Russia's enormous renewable power potential will likely remain untapped for some time is bad news--not only for Russia and its renewable power industry, but for a world that needs new sources ...

OverviewHistoryCurrent statusHydropowerGeothermal energySolar energyWind energyTidal energyRenewable energy in Russia mainly consists of hydroelectric energy. Russia is rich not only in oil, gas and coal, but also in wind, hydro, geothermal, biomass and solar energy - the resources of renewable energy. Practically all regions have at least one or two forms of renewable energy that are commercially exploitable, while some regions are rich in all forms of renewable energy resources. However, fossil fuels dominate Russia's current energy mix, while its abundant and diverse renewable energy resourc...

Abstract The expansion of renewable energy (RE) relies on both natural factors and socioeconomic conditions fostered at the regional level. This paper examines the key factors ...
