

Roman a solar glass

The blossoming of this internationalism is mirrored in the glass industry of the Roman Empire. Rome asserted its control over the two dominant glass-making centers of the late first millennium (Syro ...

From the shimmering glass of Ancient Rome to the solar cells that power our modern world -- this is the hidden story of light. Discover how human curiosity transformed glass into one of the...

This document discusses windows, solar heating, and bath architecture in the Roman Empire. It summarizes an article that argues Roman bath windows were likely glazed, refuting an earlier claim ...

The latest evidence of that is an unusual shard of ancient Roman glass (dubbed the "wow glass") that boasts a thin, golden-hued patina.

Ideal for large expanses of glass or sliding doors, our Roman Solar Shades are elegant while improving energy efficiency and helping to reduce interior fadings.

Windows were a prominent feature of Roman architecture and were especially important in the magnificent bath buildings of the Roman Empire. A growing literature attests to the Romans' use of ...

Transparent glass, the Romans discovered, acts as a solar heat trap, admitting sunlight into the desired space and holding in the heat so it accumulates inside.

Roman glass buried for 2,000 years is slowly transforming into a strange type of crystal that refracts light in surprising ways, and scientists finally know why.

Researchers discover how molecules in ancient glass rearrange and recombine with minerals over centuries to form a patina of photonic crystals -- ordered arrangements of atoms that filter and...
