

Sao Tome EK solar module project

São Tomé and Príncipe takes another concrete step towards the energy transition with the inauguration of the 1.2 megawatt photovoltaic solar park, integrated in the Santo Amaro power ...

Specializing in tropical solar installations since 2015, we provide customized photovoltaic systems for homes, schools, and hotels. Our corrosion-resistant designs are built for island conditions.

Investing in solar in a tropical climate? Learn why high humidity and salt mist demand specific module technology to avoid costly project failure.

Stay tuned for more updates on how we are supporting the development of solar PV projects that will shape São Tomé e Príncipe's energy future.

Through AMP, a community in São Tomé and Príncipe will pilot the direct commissioning of 0.7 MW of solar photovoltaic capacity and 1.0 MWh of battery storage, laying the foundation for ...

This project, selected through an international tender with six proposals, will be the largest energy storage system in Central America once operational by the end of 2025.

The Santo Amaro solar park is a joint initiative of the Government, UNDP, UNIDO, and the AfDB. The turnkey 1.7 MWp facility was developed in two phases: a 0.5 MWp plant financed by ...

The project, which has a targeted capacity of 11 MW, is aimed at cutting reliance on costly thermal generation and securing greater energy independence and resilience.

The island nation's groundbreaking energy storage project - combining solar power with cutting-edge battery systems - could become Africa's blueprint for sustainable development.

The project is expected to avoid about 13,000 tons of CO2 emissions each year and reduce fuel imports. With an installed capacity of 38 MW but only 19 MW currently available, the ...
