

Solar lighting system installation in North America

Should you install a self-contained outdoor solar lighting system?

Rather than going through the expense and hassle of trenching electric wires, you can install a self-contained outdoor solar lighting system. In addition to initial installation cost savings, solar energy systems are a lighting solution that do not require a monthly electric or meter bill, and require little to no regular maintenance.

Does solar work in any area?

Solar can work in pretty much any area, as long as there's direct view of the sun and the solar panels are. We're a USA based designer, manufacturer, and supplier of professional, commercial grade, solar lights and lighting systems. Browse our collection to find your solution!
