

# Solar power with grid backup in Senegal

Senegal opens its first solar power plant with battery storage in Saint-Louis, strengthening grid stability and clean energy supply.

Senegal has officially inaugurated the "Walo Storage" plant in Bokhol (Saint-Louis Region) on January 22, 2026. This marks a technological milestone as West Africa's first large-scale ...

West Africa's first solar power plant integrated with battery storage specifically for grid frequency regulation has been commissioned in Senegal.

Senegal has begun commercial operations at a new solar energy facility that combines photovoltaic power with lithium-ion battery storage, the first of its kind in West Africa, as the country ...

Senegal's solar boom is real, but it runs on private momentum as public ambition outpaces the state's financial capacity. Households and industries drive solar growth to secure power, turning ...

Officially entering commercial operation on July 14, 2025, it is connected to the national grid operated by Senelec to enhance grid reliability, support peak demand, and provide backup ...

Senegal and sustainable infrastructure developer Africa REN have commissioned the Walo Storage facility in Bokhol, marking the first grid-connected solar-plus-battery installation of its ...

Africa REN has commissioned a 16 MW solar plant with 10 MW/20 MWh of battery storage in northern Senegal, billed as the first grid-connected solar-plus-storage facility in West Africa.

The project was designed to improve grid stability, deliver energy during peak demand hours and provide backup power in case of outages. Completed on time, the facility is now ...

By combining photovoltaic generation with lithium-ion batteries, the facility delivers 13 MW of power for frequency support and emergency supply. This technology not only enhances grid ...
