

State s solar power

Solar energy progress by state including capacity, infrastructure, and economic statistics.

California has by far the greatest installed capacity of solar photovoltaic (PV) power of any U.S.

Discover the best states for solar power production in the country with our February Solar Energy Generation Report. Where does your state rank?

This report summarizes the latest statistics on solar power capacity by state and highlights the top U.S. states in solar power generation.

During 2016, 22 states added at least 100 MW of capacity. Just 4,751 MW of PV installations were completed in 2013. The U.S. had approximately 440 MW of off-grid photovoltaics as of the end of 2010. Through the end of 2005, a majority of photovoltaics in the United States was off-grid.

Chart: Which US states generate the most solar and wind energy? A new report tracks how renewable energy is transforming the nation's electricity mix, state by state.

[3] The United States conducted much early research in photovoltaics and concentrated solar power. It is among the top countries in the world in electricity generated by the sun and several of the world's ...
