

Sunflower-style solar power station

Unlike traditional rooftop systems, the Sunflower solar system is a ground-mounted, all-in-one solution that arrives pre-assembled and begins generating power immediately after installation.

Enter the 2.4kW solar "flower", a sun-tracking photovoltaic system designed to maximize efficiency while blending (somewhat) naturally into my backyard.

A complete review of Smartflower solar (solar flower) modules and whether they are worthwhile investment for homeowners.

The Smartflower is a revolutionary solar technology that takes much of the hassle out of setting up an off-grid solar energy system. This device is a free-standing sculpture shaped like a ...

These sunflower solar panels are best suited for homes and businesses interested in going green without compromising on looks, as they offer a new, intelligent, and innovative way to go ...

Smartflower solar panels unfurl in the morning and track the sun across the sky. In a world filled with countless rectangular solar panels, Smartflower is a rare, novel solar product.

SmartFlower puts it on display. The system opens like a giant metal sunflower each morning, follows the sun all day, and folds itself to rest at night. It is more than a pretty sight. The ...

The SmartFlower is a ground-mounted solar panel system designed to resemble and function like a sunflower. Its unique design--a form of biomimicry --allows it to track the sun's ...

While traditional solar panels sit quietly on your roof, the SmartFlower makes a statement in your yard with its ground-mounted design and flower-like appearance. The most significant ...
