

Switzerland is moving forward with plans to build large solar farms in high-mountain regions to increase renewable energy production, particularly in winter. The first major project under ...

The solar park is being built together with the local energy operator, Energia Alpina, and the renewable energy firm Aventron. It was approved by the local community in a vote.

Construction of the first Alpine solar plant in central Switzerland has started. The plant in Spiringen, canton Uri, at 1,800 to 2,000 metres above sea level is expected to supply around 12.5...

Project developer Repower, based in Poschiavo in the south of the Swiss canton of Graubünden, is to build a solar park high in the Alps. The planned solar plant below the Vorab ...

On the Muttsee dam wall of the PSW Limmern, Switzerland's largest alpine solar power plant is being built. The 2.2 MW system supplies 50% of the electricity in winter.

VARO Energy ("VARO") and Groupe E will today inaugurate Switzerland's largest ground-mounted solar power facility and a district heating power using excess heat from the refinery.

In the picturesque Alpine region of Switzerland, a groundbreaking solar power plant has defied conventional wisdom, emerging as a beacon of innovation and resilience, especially during ...

Switzerland's reputation for precision engineering extends to its outdoor energy storage solutions. These cabinets are built to withstand harsh weather, from alpine winters to humid summers, while ensuring ...

Four universities of applied sciences, including BFH, have launched alpine-pv , a new platform that offers an overview of planned alpine solar plants. Since the solar offensive came into ...

Switzerland has achieved a significant milestone in its renewable energy transition with the Madrisa Solar plant becoming the country's first high-altitude solar power facility to feed electricity ...
