

Tallinn energy storage power station is mobile

On the construction site, there is no grid power, and the mobile energy storage is used for power supply. During a power outage, stored electricity can be used to continue operations without interruptions.

As we approach 2025's energy crunch season, Tallinn's storage fleet stands ready to power 63,000 homes through 72-hour outages. Not bad for a city that only started its storage push in 2021.

New project of Tallinn energy storage company Evecon and Corsica Sole are joining forces in the Baltic Storage Platform joint venture to build and operate high-capacity battery storage power ...

No, this isn't a sci-fi novel--it's Tallinn's ambitious energy storage policy adjustment project in action. With Estonia aiming for 100% renewable electricity by 2030, the capital's new strategy is making waves.

As the 2023 European Green Capital, Tallinn isn't just famous for its medieval charm--it's also leading the charge in sustainable energy innovation. At the heart of this ...

But here's the kicker - it's not just about energy storage. This project pioneers vehicle-to-grid (V2G) integration with Tallinn's electric bus fleet, creating what engineers call a "bi-directional power ...

As sunset paints Tallinn's Old Town in gold, one thing's clear: This isn't your grandfather's energy grid. From AI-driven load balancing to experimental peat batteries, Tallinn ...

With Estonia's renewable energy capacity growing by 18% annually, the demand for efficient storage solutions has skyrocketed. Local manufacturers now export battery systems and smart grid ...

Evecon, an Estonian renewable energy company, and Corsica Sole, a French company, will build two battery energy storage systems with a total capacity of 200 megawatts in Harju County by 2025.
