

The largest photovoltaic panel produced by JA Solar

What is JA Solar?

JA SOLAR stands for durable, high-performance PV modules that generate first-class energy yields. With our broad product portfolio, we offer sustainable and innovative solutions for residential, commercial and utility projects. As one of the first suppliers with industrial PV production capacity, we took on a pioneering role at an early stage.

Why should you choose JA Solar?

Located in the Atacama Desert, the driest nonpolar desert in the world, the project places exceptionally high demands on the reliability of the PV modules. Recognized for its superior product reliability and extensive experience in supplying PV projects in desert environments, JA Solar has been selected to provide all the modules for this project.

Where are JA Solar panels made?

They also produce panels in Malaysia, Vietnam, and Phoenix, Arizona. They plan to build capacity in India, but they've been planning this for a while and nothing much seems to happen. JA Solar's current range of panels are called Deep Blue 4.0. All their panels are 1.13m wide. The shortest is 1.76m while the longest is 2.47m.

How efficient are JA Solar panels?

JA Solar panels have an average efficiency rating of 19.53%, which is almost 1% higher than other mid-range solar panels. JA Solar panels are as efficient as Panasonic's, but come at a lower starting price point. JA Solar utilizes two primary solar cell technologies in their solar panels: PERC (P-Type) and N-Type.

JA Solar supplies 1 GW of high-efficiency PV modules for China's largest Gobi Desert solar project, a key step toward its 2060 carbon neutrality goal.

JA Solar's Jumbo solar panel is the world's most powerful PV module, with a power output of over 800 W. Chinese solar manufacturer JA Solar has unveiled this new panel.

JA Solar played an integral role in electrifying Zambia's largest standalone photovoltaic installation, the 100MW Kabwe solar power plant. Exclusively equipped with JA Solar's high ...

The JA Solar monocrystalline solar panels found in our range provide an output power of 405, 550, or 460 W. JA TECH is an official distributor of photovoltaic panels manufactured by JA Solar.

JA Solar Chinese manufacturer JA Solar unveiled what is thus far the world's biggest and most powerful panel with an 810 W model. Called Jumbo, the panel has quadruple layouts of 47 cells ...

The CEME1 480MW Project, now the largest photovoltaic (PV) installation in Chile, has successfully reached full capacity grid connection. PowerChina Huadong Engineering Corporation ...

The largest photovoltaic panel produced by JA Solar

JA Solar Technology Co., Ltd. is a world-leading manufacturer specializing in high-performance photovoltaic products that convert sunlight into electricity for residential, commercial, ...

JA Solar has significantly contributed to Zambia's renewable energy expansion by supplying high-efficiency solar modules for the country's largest standalone photovoltaic installation ...

JA SOLAR stands for durable, high-performance PV modules that generate first-class energy yields. With our broad product portfolio, we offer sustainable and innovative solutions for residential, ...

Located in the Atacama Desert, the driest nonpolar desert in the world, the project places exceptionally high demands on the reliability of the PV modules. Recognized for its superior product reliability and ...
