

The role of wind power and photovoltaic power generation in communication base stations

Hybrid energy solutions enable telecom base stations to run primarily on renewable energy sources, like solar and wind, with the diesel generator as a last resort.

If something or someone plays a part or plays a role in a situation, they are involved in it and have an effect on it. They played a part in the life of their community.

The power generation system is engineered to support the complementary integration of multiple energy sources, including wind power, solar energy, and mains electricity.
