

Tokyo EK Ultra-Large Energy Storage Project

Battery storage developer Eku Energy has partnered with utility Tokyo Gas on a grid-scale energy storage project in Japan, with construction expected to start soon.

For Eku Energy, the LTDA is important to the business model of its Japanese projects but the developer, perhaps best known for projects in the UK and Australia, sees three pathways to ...

Eku Energy has agreed a 20-year offtake agreement for the latest project with utility Tokyo Gas (9531.T). Construction is scheduled to begin later this year, with an aim to begin operation...

Eku Energy announces its first energy storage project in Japan with a 30MW/120MWh battery in Miyazaki, backed by a 20-year agreement with Tokyo Gas.

Macquarie-backed Eku Energy closes first Japan battery storage project with Tokyo Gas offtake contract

Explore Japan's innovative energy storage project & its impact on renewable integration for a cleaner future.

With a rated output of 30 MW and a storage capacity of 120 MWh, Hirohara BESS will be capable of providing four hours of electricity to approximately 63,000 households, about one-third of ...

Tokyo Gas has contracted for full operating rights over a 20-year term to the Hirohara BESS, which Eku Energy will own. In April, the utility said in a Japanese-language press release that ...

Tokyo's new large-scale energy storage project is set to begin construction in Q1 2025, marking Japan's most ambitious battery storage initiative to date. This renewable energy solution aims to address ...

The facility will store enough electricity to power 63,000 households for four hours. This is Eku Energy's first battery storage project in Japan and aligns with the country's efforts to boost ...
