

The UK grid-scale battery storage market grew 45% by operational capacity in 2025, with 4GWh coming online during the year, bringing total operational capacity to 12.9GWh.

But what battery assets does the UK boast currently? How much capacity is under construction and consented, and what has the growth journey of battery storage projects looked like?

Investor interest in long-duration and co-located storage facilities is on the rise, particularly in England and Scotland, as solar and offshore wind capacity expands. Additionally, the United ...

Market Overview The UK Energy Storage Capacity Market comprises technologies and systems--such as lithium-ion batteries, flow batteries, pumped hydro storage, compressed air energy storage ...

In this blog, we'll explore the top 7 battery energy storage system projects in the UK for 2025. We'll look at each project's capacity, project cost, current status, and how it supports the broader shift to clean ...

Resolving the demand shortfall is vital for businesses across sectors to ensure suitable supply for business operations. Other sectors represent a smaller battery demand but have a significant impact ...

Battery energy storage revenues in Great Britain reached a rate of £88k/MW/year in January 2025, marking a 5% increase from December 2024 and the first back-to-back monthly revenue increase ...

Battery storage is at the heart of the UK and Ireland's transition to clean power. Our battery storage sites will provide up to 3GW of flexible capacity to accelerate the transition to a net zero future.

Our research team has identified the three largest battery storage investors from the UK. In this article we present three of them in detail.

Battery energy storage systems in the UK have seen revenues quadruple over the past year, new data has revealed.

UK energy storage battery sales
