

Villages raise funds to build solar power generation

As we approach Q4 2025, the UN's SDG7 tracker predicts solar villages could eliminate energy poverty for 300 million people by 2028 . Not bad for technology that was considered "too rural" just a decade ...

Local leaders say their nearly completed solar farm, along with an existing biomass plant, will boost the town's savings and protect residents from blackouts during extreme weather.

Recent research findings highlight the positive impacts of solar energy initiatives on rural communities, including economic development, job creation, and enhanced energy resilience.

The Office of Clean Energy Demonstrations (OCED) within the U.S. Department of Energy (DOE) has awarded Tanana Chiefs Conference (TCC) \$26 million in clean energy funding for ...

But for the small villages and rural communities hosting these projects, the story is far more personal. From fresh income streams to stronger farms, this is how solar and wind power are ...

Tanana Chiefs' leaders' ambitious plan to use federal funds from the 2021 Inflation Reduction Act to install solar panels and batteries in eight remote communities to offset the high cost ...

Solar and hydroelectric projects in villages across rural Alaska are on deck to receive up to \$125 million in funding from the giant 2021 federal infrastructure law.

Community Solution: Build a first-of-its-kind community solar charging station in Namowa. The charging station will have six 340-watt panels and 100 USB ports, allowing it to charge 100 phones at a time.

Donate now and help illuminate lives, strengthen local economies, and build a sustainable future through support for community-owned solar solutions. Together, we can light up ...

By harnessing the sun's energy, you can see how this village has transformed its living conditions, reduced its carbon footprint, and inspired others to follow suit. Join us as we explore their ...
