

Wind turbine generator share

Feed-in tariffs, tax credits, subsidies, and renewable energy requirements are a few examples of these that increase the financial appeal of wind energy projects to developers and investors. These factors ...

Regionally, Asia Pacific dominates with 46.3% market share, followed by North America at 23.5% and Europe at 20.3%, while the 1-5 MW segment accounts for the largest capacity share due to its ...

Based on installation, the onshore wind turbines segment accounted for the largest share of the global market in 2024. This growth is driven by lower installation costs, established ...

Doubly-fed induction generators led the wind turbine generator market at 55.3% share in 2024, favored for familiar maintenance practices and attractive upfront pricing.

The global wind turbine market size was valued at USD 161.83 billion in 2025 and is projected to hit around USD 339.43 billion by 2035 with a CAGR of 7.69%.

Wind Power Generators Market size was valued at \$27574.21 Mn in 2024 and is projected to reach \$44679.

In the wind turbine manufacturing sector, Siemens Gamesa holds a noteworthy share in the market owing to a broad range of onshore and offshore wind turbines. The company provides integrated ...

In 2023, Horizontal-axis wind turbines held a dominant market position, capturing more than 94.8% of the market share. This type of turbine is favored for its efficiency and capability to generate significant ...

This report provides a quantitative analysis of the wind turbine market forecast segments, current trends, estimations, and dynamics of the wind turbine market analysis from 2023 to 2033 to identify the ...

This will increase the adoption and construction of offshore wind turbines in the region, raising the demand for wind turbine components, ultimately drive the wind turbine generator market share of ...
